

More Information About **UPS Toroidal Power Transformer**

Detailed Product Description

UPS Toroidal Power Transformer

Toroidal Power Transformer for UPS

Dibao UPS Transformer is special designed for power products as AVR, UPS and so on.

Our design is according to the principle of the toroidal transformer, adjusting the winding method, controlling the leakage current and on the basis of the customer's request to design and manufacture. Because of the special closed magnetic circuit, it can enhance the capability and reduce the useless consumption in order to reduce the cost.

The UPS Toroidal Transformer is much better than the UPS EI Transformer and replaces the EI Transformer. It has less electrostatic consumption, much larger the capability of loading, lower temperature rising, and lower price than EI transformer

We have many excellent staff and have advanced produce facilities, and manage on the basis of the request of ISO9002 strictly from design, manufacture to QC.

Guarantee products quality, welcome to contact us!
